Characterization of Reach #2

- 1. (CRITH) Critical Habitat? Present
- 2. (SHP) Shape attractive for high speed boat use? High
- 3. (SHW3) How much shallowness in high speed area (0 3 Ft)? High
- 4. (SHW6) How much shallowness in high speed area (0 6 Ft)? Very High
- 5. (SGHS) How much seagrass in this high speed boat area? Very High
- 6. (SGSH) Is there seagrass between shoreline and open area/channel? Medium
- 7. (STRY) What potential that boats stray from the channel into grass? Very High
- 8. (DD) Dock Density? Very High
- 9. (BD) Boating density (how many boats travel to/thru this reach?) Very High
- 10. (AGG) Potential for traffic pattern to cross aggregation area? None
- 11. (MAADJ) How close is reach to an aggregration area? Very High
- 12. (SPZP) Is speed zone present? Present
- 13. (MOR) What are the last ten years of watercraft mortality? 6
- 14. (MGRP) What is relative grouping of watercraft mortality? Medium
